

Anne Vervarcke's Family Finder Module in RadarOpus

Leading homeopathic software

The logo for RadarOpus features a stylized blue and green circular icon on the left, followed by the word "radar" in blue and "opus" in green, all in a lowercase, rounded font.

THE WORLD'S No.1 SINCE 1982

How to use the Family Finder Module?

Section 1- enter keywords that define important elements of the case. These can be prominent themes, the style of delivery, manner of presentation, symptoms, observations etc.

Carefully chosen words that describe the primary issues of the case are entered

The screenshot shows the 'SEARCH' interface of the Family Finder Module. At the top, there is a search bar with a magnifying glass icon and the word 'SEARCH'. Below the search bar, there are two tabs: 'Words' and 'Family'. The 'Words' tab is selected, and a list of keywords is displayed. Each keyword has a checkmark on the left and an 'x' on the right. The keywords are: self, me, emotion, other, needs, care, and an empty field with a checkmark.

Keyword	Action
<input checked="" type="checkbox"/> self	x
<input checked="" type="checkbox"/> me	x
<input checked="" type="checkbox"/> emotion	x
<input checked="" type="checkbox"/> other	x
<input checked="" type="checkbox"/> needs	x
<input checked="" type="checkbox"/> care	x
<input checked="" type="checkbox"/>	x

Section 2- the module will automatically find families and remedies that correlate with your carefully chosen keywords / expressions that describe the fundamental themes of the case.

2 FAMILIES/REMEDIES

Entries covered (family members)

silicium series	4/6	(347)
<u>thym-gl.</u>	<u>3/6</u>	
elements	3/6	(88)
plac.	3/6	
<u>bivalvia</u>	<u>2/6</u>	<u>(4)</u>
buteo-b.	2/6	
gemstones	2/6	
hamamelididae (cronquist)	2/6	
sil.	2/6	
caust.	2/6	
eps-b.	2/6	
heroin.	2/6	

The more you use the module, the more you will get to know the keywords for each family. Anne has provided a broad overview of many families, distilling the information down to the most succinct points. Therefore it is good practice to use the most fundamental expressions that describe the issues in the case.
